## ALPEN OPTICS Argus LT Red Dot Sight 1x20x18

### PRODUCT INFORMATION

- High-quality red dot sight with 3 adjustable reticles
- Robust yet lightweight aluminum housing
- Dynamic dot technology saving energy and time
- High-quality coating for absolutely clear viewing quality
- Large 20 x 18 mm lens for a perfect overview
- Reticle adjustment in 0.3 MRAD steps
- Waterproof and shock-resistant

# ABSOLUTELY WEATHER- AND SHOCK-RESISTANT

Even in adverse weather conditions, this high-quality ALPEN OPTICS Red Dot Sight keeps your target firmly in view. Heavy rain, snow, fog, or even a brief submersion in a stream do not affect the Argus LT, which is waterproof up to 1 m (IPX7). The sturdy yet lightweight aluminum housing keeps liquids reliably away from the interior. The red dot sight is also filled with nitrogen to ensure clear vision even at extremely fluctuating temperatures, so the lenses cannot fog up from the inside. As a true premium red dot sight, the ALPEN OPTICS Argus LT Red Dot Sight 1x20x18 is of course shock-resistant up to 1,000 g Magnum calibers when closed.

# INNOVATIVE DYNAMICDOT TECHNOLOGY

The innovative DynamicDot Technology saves battery life by using a motion sensor, making the prism optics quickly ready for operation. The illuminated reticle automatically turns on as soon as you move the rifle and bring it into position. If it then remains motionless for 5 minutes, the illuminated reticle turns off again. This means your prism sight is quickly ready for use, saving not only power but also valuable time.

# ROBUST HOUSING

Our rifle scopes are equipped with a robust housing made of T6 6061 aluminum. This material offers an excellent balance between durability and lightness, making it ideal for use in demanding environments. The T6 6061 aluminum housing is known for its high strength and resistance to external influences such as shocks, vibrations, and extreme temperatures. This makes our rifle scopes not only reliable, but also suitable for long-term use in various conditions

# THE COATING

Another distinctive characteristic is the excellent multi-layer coating. It ensures clear viewing quality.

# 3 DIFFERENT RETICLES

Red dot 3 MOA, circle 32 MOA, dot is very free with 3 MOA for good precision, the 32 MOA circle helps with fast target acquisition.

# EXTENSIVE ACCESSORIES

Low mount and high mount for Picatinny, ACRO footprint for very flat mounting on a pistol.

ALPEN  
Deluxe Warranty

## — DELUXE WARRANTY

Good prospects for frequent observers - with ALPEN's extended guarantee - [More information](#)

Multi-Coated Lenses

## — IMPRESSIVELY BRIGHT IMAGES

Waterproof

## — WATERTIGHT DESIGN

Thanks to the waterproof housing that prevents liquids from reaching the inside of the optics, you don't need to worry about heavy rain or dropping the binoculars in a puddle.

Splashguard

## — WATERPROOF DESIGN

The housing features a splashproof design, which protects the optics during rain and adverse weather.

Lightweight

## — LIGHTWEIGHT DESIGN

Easy to carry – the optics feature a lightweight design so that you can view animals and landscapes without carrying heavy equipment.

# Mg

— Magnesium Housing

## — LIGHTWEIGHT DESIGN

The optics are enclosed by a premium aluminium housing, which provides optimal protection and keeps the weight low.

— Fogproof

## — WEATHERPROOF DESIGN

The binoculars are filled with nitrogen, which prevents the inside of the lenses from fogging up and obstructing your view during abrupt changes in temperature.

— Shootproof  
Up to 1000G

## — PREMIUM RECOIL-RESISTANT OPTICS

This premium riflescope can withstand recoil forces of up to 1000 grams, equivalent to a Magnum caliber.

— DynamicDot-  
Technology

## — INNOVATIVE DYNAMICDOT TECHNOLOGY

The motion sensor switches to standby mode after 2 minutes and immediately reactivates upon the slightest movement. After 24 hours in standby mode without any movement, it turns off completely.
